

Home Maintenance tips for Winter:

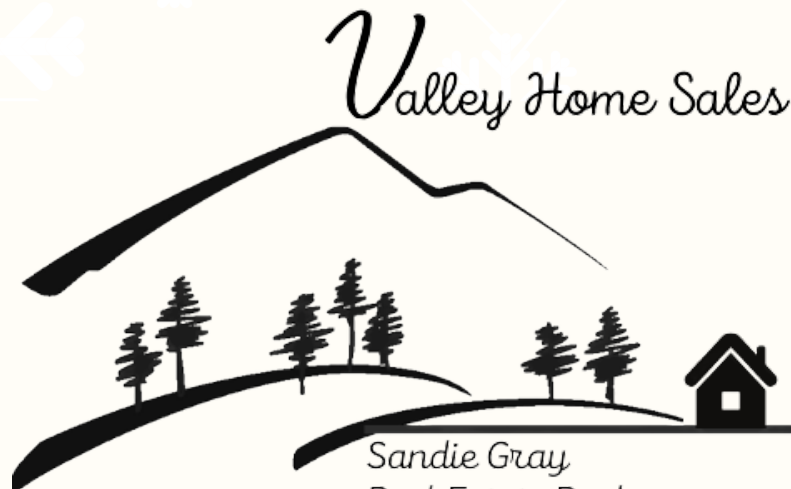

- Shut off Interior Valves that supply water to outdoor pipes.
- Change Filters in your Furnace. (This should be done monthly.)
- Inspect/ Repair/ Replace Safety devices. (Smoke detectors and Carbon Monoxide detectors.)
- Inspect Roof, Gutters and ensure they are free from all loose debris. Repair/ Replace any damaged shingles/vents.
- Test Sump pumps to ensure they are properly functioning.
- Clean dryer vents to prevent build up and decrease the chance of a fire.
- Test and Seal as needed all doors and windows to eliminate any drafts.
